31 October 1966

STAT

STAT

walked this to me this morning.

STAT

[redacted] is eligible to retire in April 1967 (60 years of age with over 43 years service). He wants to extend until December 1967 (memorandum attached). Mr. Meloon is non-committal in his endorsement memorandum (also attached).

Howard points out that [redacted] is eligible for the maximum annuity and feels that there isn't much justification for requesting the nine-month extension. He would like our reaction.

STAT

I might note that by staying on [redacted] would get a larger annuity. This is because his hi-five continues to rise and he is making involuntary "voluntary contributions" to the system which he can elect to take as a lump sum when he retires or as an addition to his annuity.
